

BURNS TOWER GETS A FACE-LIFT

Support Services began the process of painting Burns Tower on Monday. It is expected to take about six weeks to complete. Parking in the immediate area of the Tower will be closed off during the process. It will be the first time the tower will be painted since it opened in 1964.

“This is a massive project that will require a lot of coordination between our building maintenance employees, the painting contractors and the employees who will be working in the tower during the summer,” said Scott Heaton, director of support services. “By the time this project is done,

we estimate it will have used more than 1,100 labor-hours and 180 gallons of white paint.”

First, crews put up scaffolding and safety systems for workers, as well as a system to collect water and paint runoff from the project, to prevent contaminating the soil around the tower. Next, the entire tower has to be cleaned it before it can be painted. The cleaning process could take as many as 10 days to finish. After that, a coat of a masonry surface conditioner will go on, followed by a coat of acrylic white paint. It will take two to three weeks to complete the final phase of the project.

PACIFIC STUDENTS RECEIVE SCHOLARSHIPS TO STUDY ABROAD

Pacific students Kristal Leonard '11 and Devon Blount '11 have received prestigious U.S. State Department scholarships for the 2009–10 school year worth up to \$20,000 each to study abroad in China and Russia to immerse themselves in the countries' languages and cultures. Leonard and Blount were among the 130 students selected out of a pool of nearly 900 applicants nationwide to receive Boren Scholarships for the upcoming school year.

Leonard will study intensive Mandarin at Beijing University in China for 11 months. Blount will attend St. Petersburg State University in Russia to study Russian language and culture for four months.

The Boren scholarships, awarded through the National Security Education Program, provide funding for study abroad opportunities in countries and fields of study that are under-represented in study abroad programs. The program is designed to broaden the pool of qualified U.S. citizens with foreign language and international skills critical to the country's security interests. Scholarship recipients are expected to pursue federal government positions once they graduate.

"This is a real honor and opportunity for our students," said Pacific Fellowship Advisor Susan Weiner. "The NSEP allows the nation's most promising students to immerse themselves in languages and cultures less commonly taught in the U.S., and thus to take the first step toward a career in the State Department that truly contributes to the global community."
