David A. Jardine, Au.D. is the Director of Pacific Hearing & Balance Center. His areas of clinical interest are advanced diagnostics, aural rehabilitation, auditory processing and tinnitus. Dr. Jardine is a Fellow of the American Academy of Audiology and member of the American Speech-Language-Hearing Association.

Robert Hanyak, Au.D. is an Associate Professor at the University of the Pacific in Stockton, CA. His areas of clinical interest are in aural rehabilitation, amplification and pediatric diagnostic audiology. He is a Fellow of both the American Speech-Language-Hearing Association and the American Academy of Audiology. Dr. Hanyak has received several university teaching awards.

What Patients Have to Say:

“I am so pleased with the services I received at Pacific — and the facility is so beautiful. I’ve never had an assessment so complete. My new hearing aids have made a huge improvement over what I hear.”
— Jackie Voight, Orinda, CA

“The hearing aids I received through Pacific have given me back my hearing to almost normal. I am hearing myself as I did fifteen years ago.”
— Ort Lofthus, Stockton, CA

I feel fortunate to have found the Pacific Audiology Center. The Center is among the finest in Northern California. The services they deliver are exemplary. I would not hesitate to recommend them, they are great!
— Doug Eberhardt, Stockton, CA

- **Comprehensive audiological evaluations for children and adults**
- **Rehabilitation services for hearing loss (including hearing aids)**
- **Auditory processing evaluations and treatment**
- **Tinnitus (ringing in the ears) testing and treatment**
- **Vestibular function testing and rehabilitation**
- **Hearing conservation services and programs (including custom earmolds)**
- **Counseling for hearing loss and auditory disorders**

### Hearing Rehabilitation Services

- **Complete line of hearing aids & assistive listening devices**
- **All hearing instruments are fit on a no-cost, no-obligation 30 day initial basis**
- **Hearing aid accessories, including premium battery services**
- **Earmolds (hearing aids, swim molds, noise protection, and musicians earplugs)**
- **Computerized hearing aid analysis for fitting accuracy (Real Ear Measurements)**
- **Electro-Acoustic Hearing Aid analysis for accurate diagnosis of hearing aid problems**

### Hearing Loss

Hearing loss is the third most prevalent health problem affecting Americans over age 40. Hearing loss not only affects you, but also your family, friends, coworkers and the people you come in contact with on a daily basis. Hearing loss is everyone’s concern.

**Quiz: Do you need a hearing test?**

- **☑** Can you hear the sound of people talking but have to strain to understand the words?
- **☑** Do you frequently ask people to repeat what they have said?
- **☑** Do you frequently think that other people are mumbling?
- **☑** Do you turn up the volume of the TV or radio louder than your friends and family members do?
- **☑** Do you have ringing sounds in your ears?
- **☑** Do you find people easier to understand if they look directly at you when they are speaking?

If you answered “yes” to one or more of these questions, see a Doctor of Audiology at the University of the Pacific Hearing & Balance Center for a complete hearing test and evaluation.
