The Don and Karen DeRosa University Center

Opened August 2008

The Don and Karen DeRosa University Center, which opened fall 2008, has already become the social hub of Stockton’s campus. The 55,000-square-foot building houses dining venues, meeting and event facilities, student life offices, the University bookstore and a welcome center. Pacific’s first “green” building, it was constructed using environmentally friendly and recycled materials and features technology that reduces the amount of energy needed to operate the building. The University has applied for LEED silver certification. The Board of Regents named the center to honor the contributions of President Don and Karen DeRosa to the University during his transformational presidency.
President’s Message

As I hope most Pacific alumni and friends are aware, I notified the University’s Board of Regents in April 2008 of my intention to retire from the Presidency effective June 30, 2009. In looking back on my over thirteen years spent to date advancing Pacific, I am proud of many accomplishments. These include a dramatic strengthening of our academic programs on all three campuses, growth in size and selectivity of the student body, over $180 million in facilities development, invigorated student life and recreation programs, and an engaged Board that is supporting Pacific’s progress toward greater national visibility and distinctiveness.

In August, two magnificent facilities were completed on the Stockton campus – the Biological Sciences Center and DeRosa University Center. These two buildings have strengthened the environment for teaching and research in the sciences and the sense of community at the campus.

We have made great progress developing a leadership program incorporating social and emotional intelligence. This initiative integrates the efforts of both our academic and student life programs, and is a key part of an undergraduate student’s first-year experience at Pacific as well as an emerging theme within our professional programs.

With the guidance of Daniel Goleman, a nationally known expert and author in the field of emotional intelligence, Pacific is building a program that will equip our graduates with the ability to utilize social and emotional competencies to work effectively with others in career, service and personal endeavors. This year’s incoming freshmen participated in a self-assessment of these competencies and will be able to participate in co-curricular programs to strengthen their abilities in specific areas.

This fall, Pacific launched the Powell Scholars, the University’s premier academic scholarship program based on leadership development. The program is named for benefactors Robert and Jeannette Powell, whose $100 million estate gift will greatly support access to Pacific through funding of scholarships. The development of social and emotional competencies is also a key element of the leadership program for the nearly 50 Powell Scholars.

As these examples from the past year show, Pacific continues to build on its goal of being the West’s most distinctive, student-centered national university.
Points of Distinction 2007–2008

Toward Better Science Education

The University was awarded a four-year grant of nearly $1 million to improve science education in kindergarten through second grade. Faculty from the Benerd School of Education and various science departments and educators from the San Joaquin County Office of Education will work with about 35 teachers across four counties in the northern San Joaquin Valley to provide a variety of training programs.

Best in the Business

The Eberhardt School of Business was named one of the best business schools in the nation by Princeton Review’s annual law and business school guide. The rankings were based on surveys of 19,000 students attending the 290 business schools listed, and on school-reported data. In the same month, the Eberhardt School was also named in Business Week’s “The Best Undergraduate B-Schools,” an exclusive profile of 121 business programs.

Inter-American Exchange Program Launches

Pacific became the first U.S. university to enter into a student and faculty exchange agreement with the Union of Universities of Latin America and the Caribbean, the largest association of universities in Latin America. The signing was part of the launch of the Inter-American Program in the School of International Studies. An academic and residential immersion program geared toward careers related to Latin America, the Inter-American Program is an outgrowth of Pacific’s historic commitment to fostering greater understanding between the Americas and had its basis in the innovative bilingual program in Elbert Covell College from 1962-82.

New Endowed Chair in Entrepreneurial Pharmacy Practice

The Thomas J. Long School of Pharmacy and Health Sciences received a major donation by Good Neighbor Pharmacy to fund “The Good Neighbor Pharmacy Endowed Chair in Entrepreneurial Pharmacy Practice.” This enables implementation of a specialized track to prepare future pharmacists for innovative practice models and to assume ownership of private practice pharmacies offering specialized services.

Giving Kids A Smile

As part of the American Dental Association’s national Give Kids A Smile effort, faculty, residents and students at the Pacific Dental Care Clinic in Stockton screened nearly 400 school-aged Central Valley children. More than two dozen children received follow-up treatment, including cleanings and restorations. Residents provided more than $3,000 worth of free dental care.

Pacific McGeorge in the Top 20

Pacific McGeorge is ranked 16th among American law schools in the quality of its international programs and in the Top 100 ABA-accredited law schools, according to U.S. News & World Report’s “America’s Best Graduate Schools 2009.” It is the third straight year that the law school has been ranked among the nation’s Top 20 in the International Law specialty category.
Expanded Brubeck Festival Celebrates Diplomatic Milestone

This year’s Brubeck Festival celebrated the 50th anniversary of Dave Brubeck’s 1958 “Cultural Ambassador Tour.” The State Department tour had a profound effect on Brubeck and the musicians he met in other countries and set the stage for similar tours in later years. The Brubeck Institute partnered with George Washington University, the Kennedy Center for the Performing Arts, the Smithsonian, the Library of Congress and others to expand the annual Brubeck Festival to two weeks, the first week in Stockton and the second week in Washington, D.C. Featured artists included Deepak Ram Quartet from India, the Open World Russian Jazz Octet, Hiromi’s SonicBloom from Japan, and the Latin-influenced Pete Escovedo Orchestra.

Fighting Cancer with Computers

Chemistry Professor Elfi Kraka and Professor Dieter Cremer, director of nanotechnology at Pacific, have made a potentially major breakthrough in cancer research with the design of a model for an anti-cancer drug. The drug model “trains” natural substances known as enediynes to attack only cancerous tumors, leaving the surrounding healthy tissue alone. Enediynes in their natural state destroy tumor cells and healthy tissues alike. This breakthrough could greatly reduce side effects and increase the survival rate of those who undergo cancer treatment.

A Truly Outstanding Student

Pacific’s 2007-08 student body president, Joshua Foster, was named by USA Today as a member of the third USA Academic Team, the daily newspaper’s listing of the 60 most outstanding undergraduates in the country. Foster is one of only two students from California universities to be so honored. President of Pi Kappa Alpha fraternity, Foster was also recognized as one of the top undergraduate fraternity members in the world by the North-American Interfraternity Conference.

Carved in Cement

The School of Engineering and Computer Science Pacific Resources Research Center (PRRC) received a $2 million grant to develop a revolutionary, sustainable cement production technology. Global cement production is a major contributor to the world’s greenhouse gas emissions. With the demand for cement increasing worldwide, the need for sustainable concrete production techniques has become a top priority. Dr. Henghu Sun of the PRRC has developed a method of production that will exceed current cement performance and quality. The new technology is more durable than conventional cement, and the production process is clean, uses less energy and virtually eliminates greenhouse gas emissions.

Profiles of Giving

Dr. and Mrs. Colin Wong

An old Chinese saying suggests, “When you take a drink, take a moment to contemplate where it came from.”

This thought has helped Dr. Colin Wong ‘65 to shape the cornerstone of his philosophy on philanthropy. “When you have had a successful life and a rewarding career, you have to reflect on who imparted this ability to you, and how you came to take the road that you have traveled in life,” he says. “The education I received at Pacific gave me the confidence to be a skilled practitioner. Now I have the opportunity to give something back, and that’s a wonderful feeling.”

A past president of the Arthur A. Dugoni School of Dentistry Alumni Association, Wong serves as the president of the Pacific Dental Education Foundation. He is giving back and inviting others to join him. “This is a very exciting time for the PDEF board as we work toward our next campaign goal.”

Young Alumni Create New Opportunities

John Wong and Tom Bragdon graduated from the Thomas J. Long School of Pharmacy and Health Sciences in 2001 and immediately began giving back to their alma mater and to their profession, recognizing the great need for scholarship support for students. Owners of Patterson Family Pharmacy, they provide the community with individualized care and specialized services in the Pacific tradition. They have created a scholarship for pharmacy students who provide care to residents of Stanislaus County.

Sujeel Vhan graduated from the Thomas J. Long School of Pharmacy and Health Sciences in 2006. This young alumnus recognizes the importance of scholarships to students and wished to show his support and allegiance to his alma mater by providing a scholarship for a student who is active in charitable events.

Enduring Valentine

Born on Valentine’s Day in 1909, Kathe Underwood loved music. After escaping Nazi Germany in 1938, the Underwoods eventually settled in Stockton. Kathe earned a BA in education from Pacific and taught in Stockton Unified School District for 25 years. She was one of the founders of the Stockton Opera Association and the Friends of Chamber Music. Her late husband, Lucas, was a professor of music history at Pacific and founded Pacific’s opera program. The two sought to create a high quality opera program and worked tirelessly on its productions.

The Underwoods established the Dr. Lucas and Kathe Underwood Endowed Scholarship for music majors and funded the Lucas Underwood Opera Endowment. These endowments provide opportunities for talented students to attend Pacific’s Conservatory of Music and achieve their dreams. Kathe Underwood passed away in August 2008 at the age of 99, but the Underwoods’ gift of music will endure.
Al and Lois Irwin

Al ’42 and Lois ’42 Irwin met as students at Pacific more than 70 years ago and always had fond memories of their time here. Al participated in basketball, swimming and football, and recently was honored with the Amos Alonzo Stagg Award. Lois was a student advisor, a member of Epsilon Lambda Sigma Sorority (now Delta Gamma) and worked on campus to help fund her education.

Because of their passion for Pacific and their commitment to education, the Irwins established the Al and Lois Irwin Family Education Scholarship to benefit students at the Benerd School of Education. They have always believed that educators play a significant role in the formation of well-rounded, successful adults, from elementary school through college. They also established the Al and Lois Irwin Family Athletic Scholarship to provide financial support to deserving student-athletes. Lois Irwin passed away in July 2008, but through these scholarships they have created a legacy that will continue to impact lives for years to come.

Ronald Shelly Honors Two Professors

Ronald Shelly, a 1965 graduate of the School of Engineering and Computer Science, is a longtime donor to University of the Pacific. Named “Most Inspirational Player” on the men’s basketball team in his senior year, Shelly received the “Alumni of the Decade of the 1960s” award in 1970 from the Pacific Alumni Association. He is a member of the Block P Gift Club, the Pacific Tigers Athletics Association and the Dean’s Council for the School of Engineering and Computer Science.

Shelly’s commitment to help fund the John T. Chambers Technology Center is evidenced by his support of two new Engineering Labs. He chose to name the labs to express his gratitude to Professors James Morgali and Robert Hamernik for the significant role they played in his educational and professional life. The Professor James Morgali Modeling and Simulation Laboratory will support modeling and simulation, rapid prototyping, systems engineering and geographic information systems. The Professor Robert Hamernik Construction Management and Sustainable Development Laboratory will support virtual construction, 3-D modeling, green construction, deconstruction and reuse and energy conservation.

The John T. Chambers Technology Center will provide cutting-edge facilities for superior teaching, learning and research as well as for beta-site and benchmarking to attract industry, federal, state and local agency support for collaborative research.
Investing in Tomorrow

Norman Allen ’88, ’94 was very active in leadership while at Pacific. “Norm emerged as a highly respected student leader, forging strong relationships among his peers and the administration,” said Judy Chambers ’58, ’60, former vice president for Student Life. He held top leadership positions in Greek and residence life, The Pacifican and student government, including ASUOP president.

After completing his bachelor’s degree in communication and political science and his JD at Pacific McGeorge School of Law, Allen began his career as a corporate litigator. He later joined Carpenter Moore Insurance Services, a subsidiary of NASDAQ, where he advises companies on executive risk management solutions.

Allen has remained committed to the University’s success, and currently serves on the Pacific Alumni Association Board and the Pacific Fund Advisory Board. This past year, Allen became a Pacific Fund Founder, committing to give $25,000 over five years to support undergraduate scholarships, experiential learning, academic innovation and faculty and student research. “I give back so that the next generation of students can have access to the same enriching experiences from which I benefited,” said Allen. “It is up to us, as alumni, to pave the way for Pacific’s future.”

Student Investment Fund Gives Back

In spring 2007, the Eberhardt School of Business launched an experiential learning program in which both undergraduate and MBA students manage a $1 million investment fund. An initial gift from Douglass M. Eberhardt ’59 and the Bank of Stockton made the Student Investment Fund (SIF) possible.

The SIF is fully student-managed. About 10 students are chosen through a formal application process. They research and evaluate, write reports and determine where and how to invest the money. The SIF grew to over $1.2 million, with returns outperforming the S&P 500 and other funds. The Pacific Board of Regents invested another $250,000, bringing the fund to a total of $1.45 million.

The terms of the fund specify a percentage of the annual proceeds be returned to the University, shared equally between the men’s water polo team, speech-language pathology, and the Eberhardt School of Business. The first SIF disbursement was presented last April at the annual board meeting. Only a year after the fund’s inception, a total of $48,191 was distributed — just over $16,000 to each of these units.
Scholarships Support Student Achievement
The Pacific Fund provides scholarships and grants to deserving students through the generosity of many loyal alumni, parents, employees and friends.

“I am grateful for all of the Pacific Fund donors who have opened up the doors of opportunity for me,” said Theo Nishimura ’11, a graphic design major from Stockton. “In my first year on campus, I grew intellectually through my coursework and gained invaluable leadership experience. I now serve as a member of the ASUOP Arts & Entertainment programming board, and I am the lead designer on the University Center branding committee and the editor of a campus publication. The practical skills and confidence I am developing at Pacific will help me achieve my goal of one day being editor of Time magazine.”

In addition to scholarships, Pacific Fund grants enable students to pursue research initiatives, experiential learning, and travel abroad. Investing in the Pacific Fund helps prepare students for lasting achievement and responsible leadership in their careers and communities.

Capital Interns
Three Pacific McGeorge students served internships last summer in Washington, D.C., thanks to the generosity of the Robert T. Matsui Foundation for Public Service. The foundation honors the late Congressman Robert Matsui, who represented the Sacramento area in the U.S. House of Representatives from 1979 to 2005.

Each Robert T. Matsui Fellowship provides a stipend to allow a law student to pursue a public service project or placement in a federal agency. Megan Herberger ’09 interned at the Millennium Challenge Corporation, a federal government organization that works with some of the poorest countries in the world. Sarah Dansereau ’10 worked for FairVote, a public-interest group that develops and promotes practical strategies to improve elections at the local, state and national levels. Scott Keefe ’10 served his internship with the U.S. Department of the Interior.
Financial Highlights

July 1, 2007 – June 30, 2008

The 2007-08 fiscal year presented two challenges: a declining financial market and a dip in student enrollment for the academic year. By year’s end, however, the University had made several notable achievements:

- An operating surplus of $16.3 million
- The close of the Investing in Excellence Campaign at a record amount of approximately $330 million of gifts and pledges
- Tuition revenue up more than $9 million (or 5.9%)
- Government grants up $3.7 million (10.5%)
- Private grants, gifts and bequests up $6 million (29.4%)

Endowment

Investments decreased along with the decline of the financial market, from $220 million to $209 million. However, the endowment still contributed a record $8.5 million to University operations — a 4.5% spending rate.

Biological Sciences Center
A new state-of-the-art teaching and research facility housing Pacific’s most popular undergraduate major opened for classes with the fall term. The two-story, 60,000-square-foot Biological Sciences Center provides valuable teaching and research space for up to 1,000 students each year. The Center features a 178-seat auditorium and a 96-seat classroom, both with automated projection screens, adjustable whiteboards and sophisticated sound systems. There are also 10 additional teaching laboratories and wireless internet throughout. Each faculty member has private, secure research lab space, which facilitates close collaboration on research projects between professors and students.

Doing Our Part
In order to steward University funds, donor contributions and our natural resources, University of the Pacific has reduced the size and weight of the 2008-09 President’s Report and Honor Roll of Donors. This report uses less paper and ink, and costs less to print and mail, than in previous years. It was printed on paper containing 10% post-consumer waste by a local printer certified by the Forest Stewardship Council for its green printing processes.
