Whether your business is for-profit or not, volunteer or professional, CPCE is the place in Stockton where organizations and associations gather to discuss their work, learn best practices and strategize for the future.

CPCE has three training rooms of varying sizes. Each is equipped with user-friendly technology. Interactive “Smart Board and Televisions” provide electronic ink, capture, and white boarding capabilities. One training room is a computer lab that accommodates up to 20 work stations. Software can be added to each computer workstation to assist in your presentation or training session.
