Subject Area: High Translucent Multilayered Zirconia and Monolithic Coloring Techniques

Title: "Creating a Balance with Art and Nature"

Course Description:

Discover how to bring art and nature into harmony with Aidite 3D ProZir and EZneer Zirconia. Learn how Biomic Stain and Glaze transforms digital designs into lifelike restorations that combine strength, beauty, and efficiency.

Objectives:

- 1) Explore nature-inspired esthetics with Aidite 3D ProZir and EZneer Zirconia.
- 2) Master Biomic Stain & Glaze techniques for lifelike results.
- 3) Balance digital efficiency with artistic finishing for predictable outcomes.

Short Bio:

Master Ceramist and Certified Dental Technician at Dr. Diana Fat Prosthodontics office in Sacramento, California and has been in the dental lab business since graduating from Diablo Valley College Dental Technicians program in 1983. Has completed my Post Graduate studies at UOP Dental School San Francisco and Las Vegas Institute for Advanced Dental Studies. Throughout his career, he has traveled around the country to lecture and lead hands-on learning workshops.

While Dr. Fat and Todd have been working together for 20 years now, for the last 8 years, he's transitioned into working "exclusively" with her in the office because of how much he enjoys meeting and working closely with patients to help create the "Perfect Smile" they've always wanted.
