Architectural history follows a canon of both traditional and eclectic styles from ancient to contemporary times. But what happens when a mix of whimsy, eccentricity, humor—and sometimes the creator’s genius—insert themselves into the mix? Occurring throughout time and in various parts of the world, these unconventional structures exist to serve the cultures they were created for, from ancient religious sites to modern car-culture merriment. This course explores a myriad of structures set against the backdrop of the societies in which they existed, the construction methods used, the patrons for whom these structures were constructed, and the notions of the builders and architects who created them.

Topics include the rise of Disney animation and theme parks, the company’s 1990s revival, and the strategic acquisitions that transformed Disney into a media conglomerate. We will also examine Disney’s future and gain insights into what it’s like to work behind the scenes at the company. Throughout the course, we will consider diverse perspectives—from those who revere the Magic Kingdom to those who critique it and everywhere in between.
